

# **ENGINEERING & CONSTRUCTION Bulletin**

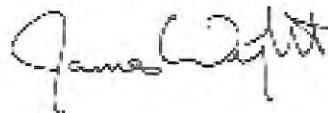

Issue No. 2006-06

14 September 2006

Type: Information

**Subject:** Naval Facilities Engineering Command's (NAVFAC) 2007 Design Awards Program

1. The 2007 Design Awards Program is being established to recognize specific achievements by NAVFAC organizations, and by Architects, Engineers, Planners and other professionals accomplishing design work under contract for NAVFAC, that demonstrate and promote design excellence with respect to both the built and natural environment. Participation in this program by all NAVFAC components is highly encouraged.
2. Ensuring that NAVFAC and its customers receive the best possible design products, especially facilities within which we live and work, is an integral part of responsible stewardship of public resources. Further, excellent facilities and environments enable and motivate us toward excellence in all our endeavors. This program seeks to recognize excellence in design activities, design products, and associated management activities, and to publicize these accomplishments as examples to be emulated by others.
3. This awards program is open to all NAVFAC components with planning-, design-, or construction-related responsibilities. A [Guide to Participation](#) in the 2007 NAVFAC Design Awards Program provides the requirements to participate in the program and the Quality Identification Elements for judging.
4. Entry deadline for all submissions is 2400 hrs Eastern Daylight Time (EDT), 1 November 2006. Submissions for this program will be electronic only; to make a submission, [click here](#). Hardcopy submission or information will not be accepted without prior approval from the program administrator.

James W. Wright, Ph.D., P.E.  
Chief Engineer and Director,  
NAVFAC Capital Improvements
