

Direction/Combat Center Facility. FAC: 1402

CATCODE: 141449

OPR: AFNIC

OCR: AF/A30-A

1.1. **Description.** This facility houses command and control center for control of Nellis Range activities. The **Operations Room** (also known as **Combat Information Center** or under the British system, **Action Information Centre**) is the tactical center of a warship or AWAC aircraft providing processed information for command and control of the near battle space or 'area of operations'. Within other military commands, rooms serving similar functions are called by the similar "Command Information Center" or simply "Command Center"; the number of different terms for spaces that serve much the same function may explain why the plain and generally non-descriptive "Operations Center" is a prevalent term. Regardless of the vessel or command locus, each CIC organizes and processes information into a form more convenient and usable by the commander in authority. Each CIC funnels communications and data received over multiple channels, which is then organized, evaluated, weighted and arranged to provide ordered timely information flow to the battle command staff under the control of the CIC officer and his deputies.

1.2. A defined facility standard is not currently available for this CATCODE. By default, all requirements are user justified until a standard is established or adopted.
