

Avionics Shop. FAC: 2171

CATCODE: 217712

OPR: AF/A4L

OCR: WR-ALC/752 CBSG

1.1. **Description.** This shop accommodates organizational and intermediate level maintenance activities for the following aircraft equipment and accessories: Airborne communications, cameras, bombing systems, and tactical support element/communications security (TSEC/COMSEC) equipment. TSEC/COMSEC equipment includes equipment for secure voice, identification friend or foe (IFF), selective identification feature (SIF), data link pods, etc.

1.2. **Requirements Determination.** Obtain additional information from the MAJCOM and AF/A4L.

1.3. Scope Determination.

1.3.1. Major items that require shop and storage space are storage racks for serviceable equipment and equipment waiting for maintenance or parts; coding devices; technical data and code books; pod lifting devices, cradles; and storage racks.

1.3.2. For Pod Storage Requirements see Table 1.2, Note 2.

1.4. **Dimensions.** See Table 1.1.

1.5. **Design Considerations.** Ensure shops have intrusion detection and alarm systems. Ensure avionics pod shops comply with local, state, and federal requirements in respect to air emissions, as required by AFI 32-7040. Locate facilities to comply with explosives safety standards. Some storage space provides physical security and corrosion protection for delicate electronic equipment. Combine maintenance and storage facilities so that they can share the secure storage area if possible. Ensure shop design complies with facility design instructions to minimize radiation exposure as outlined in paragraph 3.2. of AFI 48-148, *Ionizing Radiation Protection*.

NOTES:		

1. This includes offensive avionics system test equipment and electronic countermeasure (ECM) equipment.
2. Communications and navigation require additional secure storage. Navigation requires 9.3 m² (100 ft²). Communications without data link pods require 9.3 m² (100 ft²). ECM pod secure storage requirements are 177 m² (1,905 ft²) for 1 to 12 pods and 254 m² (2,734 ft²) for 13 to 24 pods.
3. Authorized post-attach command and control systems (PACCS) function requires an additional 372 m² (4,000 ft²).
4. Space is determined by individual analysis and validated by the appropriate MAJCOM.
5. Based on previous calculations for C-141 avionics shop. Refine space requirement by individual analysis.
