8 FUNCTIONAL DIAGRAM ............................................................................................ 208-7
1 PURPOSE AND SCOPE
This document outlines Space Planning Criteria for Chapter 208: Chaplain Service. It applies to all medical facilities at the Department of Veterans Affairs (VA).

VA Chaplains are the professional health care providers on the interdisciplinary health care teams that are qualified, employed, and endorsed by their faith group endorsers to provide spiritual and pastoral care. VA chaplains have a three-fold responsibility to the patients at every VA facility; to ensure that patients (both inpatients and outpatients) receive appropriate clinical pastoral care, to ensure that hospital, domiciliary, and nursing home patients' constitutional right to free exercise of religion is protected, and to protect patients from having religion imposed upon them. The spiritual dimension of health must be integrated into all aspects of patient care, research, emergency preparedness, and health care education. Chaplains minister to the patients’ family and loved ones, as appropriate and may provide limited counseling services to VA staff members through employee assistance.

2 DEFINITIONS

Accessible: A site, building, facility, or portion thereof that complies with provisions outlined in the Architectural Barriers Act of 1968 (ABA).

Architectural Barriers Act (ABA): A set of standards developed to insure that all buildings financed with federal funds are designed and constructed to be fully accessible to everyone. This law requires all construction, renovation, or leasing of sites, facilities, buildings, and other elements, financed with federal funds, to comply with the Architectural Barriers Act Accessibility Standards (ABAAS). The ABAAS replaces the Uniform Federal Accessibility Standards (UFAS).

Full-Time Equivalent (FTE): A staffing parameter equal to the amount of time assigned to one full time employee. It may be composed of several part-time employees whose total time commitment equals that of a full-time employee. One FTE equals a 40 hours per week.

Functional Area: The grouping of rooms and spaces based on their function within a specific service. Typical functional areas for Chaplain Service include Reception Area, Staff and Administrative Area, Chapel / Worship Area, and Education / Training Area.

Input Data Statement: A set of questions designed to elicit information about the healthcare project in order to create a Program for Design (PFD) based on the criteria parameters set forth in this document. Input Data Statements could be Mission related, based in the project’s Concept of Operations; and Workload or Staffing related, based on projections and data provided by the VHA or the VISN about the estimated model of operation. This information is processed through mathematical and logical operations in SEPS.

Program for Design (PFD): A space program based on criteria set forth in this document and specific information about Concept of Operations, workload projections and staffing levels authorized.

SEPS (VA-SEPS): Acronym for Space and Equipment Planning System, a digital tool developed by the Department of Defense (DoD) and the Department of Veterans Affairs to generate a Program for Design (PFD) and an Equipment List for a VA healthcare project based on specific information entered in response to Input Data Questions. VA-SEPS incorporates the propositions set forth in all VA Space Planning Criteria chapters. VA-SEPS has been designed to aid healthcare planners in creating a space plan based on a standardized set of criteria parameters.
3 OPERATING RATIONALE AND BASIS OF CRITERIA

A. Space planning criteria have been developed on the basis of an understanding of the activities involved in the functional areas of the Chaplain Service and its relationship with other services of a medical facility. These criteria are predicated on established and/or anticipated best practice standards, as adapted to provide environments supporting the highest quality health care for Veterans.

B. These criteria are subject to modification relative to development in the equipment, medical practice, vendor requirements, and subsequent planning and design. Space allocations will also take into account the requirements of organizations with which VA have formal affiliation agreements, such as the Association for Clinical Pastoral Education. The selection of the size and type of Chaplain Service equipment is determined by VACO and upon Veterans Health Administration (VHA) anticipated medical needs.

4 INPUT DATA STATEMENTS

A. Mission Input Data Statements
   1. Is a MS&N Patient Care Unit authorized for this facility? (M)
   2. Is a Mental Health and Behavioral Patient Care Unit authorized for this facility? (M)

B. Workload Input Data Statements
   1. How many patient beds in total are projected for this facility? (W) (Do not include SCI)
   2. How many MS&N patient beds are projected? (W)
   3. How many Mental Health and Behavioral Patient Care Unit patient beds are projected? (W)
   4. How many SCI patient beds are projected? (W)
   5. How many Muslim faith worshippers are projected? (W)
   6. How many Buddhist faith worshippers are projected? (W)
   7. How many worshippers of other faiths are projected? (W)

C. Staffing Input Data Statements
   1. How many Staff Chaplain FTE positions are authorized? (S)
   2. How many Intermittent Chaplain FTE positions are authorized? (S)
   3. How many Contract Chaplain FTE positions are authorized? (S)
   4. How many Fee-basis Chaplain FTE positions are authorized? (S)
   5. How many Clerical FTE positions are authorized? (S)
   6. How many Chaplain Student FTE positions are authorized? (S)

D. Miscellaneous Input Data Statements
   1. Is a Secretary FTE position authorized? (Misc)
   2. What is the percentage of Protestant worshippers? (Misc)
   3. What is the percentage of Catholic worshippers? (Misc)

5 SPACE CRITERIA

A. FA1: Reception Area:
   1. Waiting (WTG03) ..................................................................... 80 NSF (7.5 NSM)
      Provide one for the Chaplain Service.
      Allocated space accommodates one standard chair @ 9 NSF, one bariatric chair @ 14 NSF, one accessible space @ 10 NSF, and circulation; total three people.
2. Toilet, Public (TNPG1) .............................................................. 60 NSF (5.6 NSM)
   Provide two for the Chaplain Service.
   Allocated NSF accommodates one accessible toilet @ 25 NSF, one wall-hung lavatory @ 12 NSF, ABA clearances, and circulation. One for Male and one for Female. Ablutions and cleansing may be performed here.

B. FA 2: Worship Area:

1. Chapel / Worship Room (RAS01) ........................................ See Formulae Below
   The number of fixed seating is determined by the following formulas:
   a. If the percentage of Protestant Patients is 63% or greater:
      Total number of projected patient beds (do not include SCI) x 0.23 x percentage of Protestant patients = Number of Seats
   b. If the percentage of Protestant Patients is less than 63%:
      Total number of projected patient beds (do not include SCI) x 0.29 x percentage of Catholic patients = Number of Seats

   **TABLE 1: SEAT CALCULATION**

<table>
<thead>
<tr>
<th>TOTAL NUMBER OF SEATS</th>
<th>NSF REQUIRED</th>
</tr>
</thead>
<tbody>
<tr>
<td>64 Seats or less</td>
<td>7.6 NSF / seat + 100 NSF</td>
</tr>
<tr>
<td>65 - 105 Seats</td>
<td>7.2 NSF / seat + 400 NSF</td>
</tr>
<tr>
<td>106 – 409 Seats</td>
<td>7.0 NSF / seat + 600 NSF</td>
</tr>
<tr>
<td>410 and Greater Seats</td>
<td>8.4 NSF / seat</td>
</tr>
</tbody>
</table>

   Plus Accessible Space calculated as follows:
   a. MS&N Hospitals: 0.14 x Total Seats = MS&N spaces
   b. Mental Health Hospitals: 0.05 x Total Seats = MH spaces
   c. MS&N spaces + MH spaces + total number of projected SCI patient beds = Total number of Accessible spaces.
   d. Total Accessible spaces x 20 NSF per space = Total Accessible Space.

2. Eucharistic Room (RABS1) ................................................ 120 NSF (11.2 NSM)
   Provide one for the Chaplain Service.
   The Eucharistic Room will be reserved for the Blessed Sacrament and private meditation. It must have room for 4 chairs and free-standing kneelers, an altar, tabernacle and an electric sanctuary lamp.

3. Multi Denominational (RAMR1) ........................................... 180 NSF (16.7 NSM)
   Minimum NSF; provide an additional 120 NSF per each increment of eight Muslim, Buddhist, or other faith worshipers.
   This space is provided for worshipers of faiths other than Christian.

4. Quiet Room (RAMR1) ....................................................... 120 NSF (11.2 NSM)
   Provide one for the Chaplain Service.
   This area is provided for families in need of a place for private prayer, private consultation with clergy, and for grieving.
C. FA 3: Staff and Administrative Area:

1. **Office, Chaplain (OFA04)................................................... 120 NSF (11.2 NSM)**
   
   Provide one per each Staff Chaplain FTE position authorized, provide an additional one for every increment of four Intermittent, Contract, and Fee-basis Chaplain FTE positions authorized.

2. **Secretary (OFA07).......................................................... 56 NSF (5.3 NSM)**

   Provide one if a Secretary FTE position is authorized.

3. **Workstation, Clerical (OFA07)........................................... 56 NSF (5.3 NSM)**

   Provide one per each Clerical FTE position authorized.

4. **Workstation, Student (OFA07)........................................... 56 NSF (5.3 NSM)**

   Provide one per each Chaplain Student FTE position authorized.

5. **Consult Room (OFDC2).................................................... 120 NSF (11.2 NSM)**

   Provide one for the Chaplain Service.

6. **Storage Room (SRS01)..................................................... 40 NSF (3.7 NSM)**

   Space for office supplies and informational material.

D. FA 4: Support Area:

1. **Storage, Multi-denominational Room (SRS01)............. 60 NSF (5.6 NSM)**

   Provide one for the Chaplain Service.

2. **Housekeeping Aides Closet (HAC) (JANC1)............... 60 NSF (5.6 NSM)**

   Provide one for the Chaplain Service.

E. FA 5: Education Area:

1. **Education / Training Room (CFR01)............................ 240 NSF (22.3 NSM)**

   Allocated NSF accommodates six conference chairs @ 7.5 NSF each, two 5'-0" x 2'-0" tables at 10 NSF each, one credenza @ 8 NSF, and circulation; total six people.

6 PLANNING AND DESIGN CONSIDERATIONS

A. Net-to-department gross factor (NTDG) for Chaplain Service is **1.30**. This number when multiplied by the programmed Net Square Foot (NSF) area determines the Departmental Gross Square Feet (DGSF).

B. The first priority in the placement of Chaplains’ workstations is the proximity to patient care areas so that Chaplains may provide pastoral care and counseling. When feasible, Chaplain Staff and administrative space should be close to the chapel / worship space.
7 FUNCTIONAL RELATIONSHIPS

Relationship of Chaplain Service to services listed below:

Legend:

Relationships:
1. Adjacent
2. Close / Same Floor
3. Close / Different Floor Acceptable
4. Limited Traffic
5. Separation Desirable

Reasons:
A. Common use of resources
B. Accessibility of supplies
C. Urgency of contact
D. Noise or vibration
E. Presence of odors or fumes
F. Contamination hazard
G. Sequence of work
H. Patient’s convenience
I. Frequent contact
J. Need for security
K. Others (specify)
L. Closeness inappropriate
